Problem statement

- Creating a personal portfolio is essential to showcase my skills, projects, and achievements in a professional manner.
- Many opportunities are missed when there is no centralized platform to present my work effects

Project Overview

Creating a personal portfolio is essential to showcase my skills, projects, and achievements in a professional manner

. Many opportunities are missed when there is no centralized platform to present my work effectively.

A well-structured portfolio solves this by highlighting my capabilities and making a strong impression on viewers.

End User's

The end users of this portfolio are recruiters, employers, and clients seeking skilled professionals. It also serves students, peers, and collaborators who want to understand my work and capabilities.

Anyone interested in my technical skills, creativity, and achievements can benefit from it.

The portfolio ensures easy navigation and clear presentation for all types of users.

Tools And Technologies

- Portfolio is built using HTML, CSS, and JavaScript for a responsive and interactive design.

Portfolio Design And Layout

The portfolio features a clean and modern design for easy readability and visual appeal.

It uses a responsive layout to ensure compatibility across all devices. Sections are well-organized, highlighting skills, projects, and achievements effectively.

Features And Functionality

The portfolio showcases my projects, skills, and achievements in an organized manner.

It includes interactive navigation for smooth browsing across sections.

Additional features like contact forms and external links allow easy communication and networking.

Results and screenshot

About me hello: I am s. Sufiya Sabahath a passionate and Professional with a strong focus on html, c++, I enjoy turning Complex challenge into simple .
